

General Information:

The White House Robotics team competes in VEX VRC competitions. This year's game is called [Turning Point](#) and game details can be found at the provided link. The robotics team meets Monday and Thursday from 6:30-8:00. Dues are \$20 and students are also expected to purchase a team t-shirt to wear to competitions for an additional \$20.

The robotics club is a parent and volunteer coached sport. If you have helped your student with their homework, you can help them with robotics. We need more parent involvement in the robotics room.

The Robotics team competes in 3-4 events from October to March. We host a tournament the last weekend of January (January 26th, 2019) each year, which requires the whole team's help to support. The tournament is our biggest fundraiser. The state championship is held in March and the World championships are held in April in Louisville, KY.
